## WHAT TO ORDER

### STOCKING FOR THE SEASON

To determine the right size run to order for a style, look at your retail velocity and local demographics. Below is a typical, minimum size run to use as a starting point.

STANDARD SIZE RUN		
	Men's	Women's
S		1
M	1	2
L	2	2
XL	2	1
2X	1	

Reminder: Products marked throughout this catalog as “Spring Season Only” will only be available for this season and only available while supplies last.

Consider ordering higher quantities on these products to ensure availability for your customers during summer season.

**To get the most out of your upcoming order, ensure you have the right mix of products for the Spring/Summer 2022 season.**

Your selections directly affect your season’s apparel sales performance, including department profitability and customer satisfaction.

### BEFORE YOU ORDER

- Consider what budget you have for this collection.
- Your retail space needs to work to its maximum potential. Do not under or over-fill your apparel display. Focus on fewer styles in greater stock depth, so you have sizes available in store for customers to purchase.
- This range arrives with the 2022 motorcycle season. Stock the right amount of product to maximize clothing, gear & gift sales, online and in-store. Make sure you introduce the apparel range when selling new vehicles.
- What is Final Season, and will be obsolete with the new collection?
- Consider your demand during events throughout the season, e.g. Open Houses, Demo Days, etc.
- Don’t be too conservative. If you believe in a product, you will sell it. You won’t sell anything new if you don’t present anything new.
- Buy products you like, but make sure you have something for every rider/buyer that comes into your dealership.

**If you don’t stock what your customers want, they will go somewhere else to buy their product!**
